

March 9, 2009

Dear Metal Innovations and B&G Industries,

On behalf of Everts Air Cargo, I would like to thank Norm Fromm, Tim Mix, Aaron Rhay, David Shinen, Jim Hederman, Kevin Morency, John Olin and Chris Stewart of Metal Innovations and B&G Industries for braving the cold and coming to Fairbanks during the month of February, 2009. Your work here was a great asset to our company.

During MII/B&G's time in Fairbanks, you contributed 2,133 man hours to our maintenance efforts over the course of five weeks. With your assistance, we were able to complete four C checks and three B checks on the DC-6 fleets for Everts Air Cargo and Everts Air Fuel. C checks were completed on aircraft N400UA, N555SQ, N6586C, and N444CE; B-Checks were completed on N151, N351CE, and N9056R. Additional maintenance was also performed on several other company aircraft.

We at Everts appreciate having the opportunity to work with the whole staff at Metal Innovations and B&G Industries, mechanic and administration alike. We hope to have the chance to work with your whole team again in the future.

Sincerely,

A handwritten signature in black ink that reads "Scot Brown".

Scot Brown
Director of Maintenance
Everts Air Cargo
